

THE REYES LAW FIRM, P.A.

ATTORNEYS AND COUNSELORS

The Reyes Law Firm, P.A., is proud to offer its clients three boardroom-style conference rooms with a full suite of telecommunication and audio-visual display capabilities to facilitate any specialized needs. These conference rooms provide our clients with the means to better communicate by offering Wi-Fi access, video conferencing, video playback, PowerPoint and Keynote presentations, and document display. We pride ourselves on providing our clients with cost-effective, efficient, and high-quality legal solutions and alternative dispute resolutions, and our state-of-the-art conference rooms expedite these goals.

Conference Room One and Conference Room Two are each equipped with:

- Two monitors: a 70" touch-panel monitor and a 60" rear-room monitor. The dual monitors allow a user to either simultaneously display the same image on both screens or display two different images from two different sources on each screen, e.g., a Microsoft PowerPoint presentation from a laptop on one screen and a video conferencing session on the other screen.
- Full video conferencing software with included camera, microphone, and speakers.
- Wi-Fi internet access.
- A desktop computer with a hard-wired internet connection and Microsoft Office 2010 Suite (Word, PowerPoint, and Excel). Users can bring their own USB flash drive, DVD-ROM, or CD-ROM to open and view or edit their files on the conference room monitors.
- Personal laptop connection to display their laptop images onto the conference room monitors. The rooms accommodate either HDMI or VGA connections.
- An Apple TV to provide iOS and iTunes users with AirPlay capabilities.
- A Blu-Ray/DVD player for video playback.
- Powered drop-down curtains to provide privacy and control of natural lighting.

Conference Room Three is equipped with:

- Two monitors: a 55" touch-panel monitor and a 40" monitor.
- Full video conferencing software with included camera, microphone, and speakers.
- Wi-Fi internet access.
- Personal laptop connection to display their laptop images onto the conference room monitors. The rooms accommodate either HDMI or VGA connections.
